

Master in Life Sciences

A cooperation between
BFH, FHNW, HES-SO, ZHAW

| | |
|--|--|
| Module title | Design of Biopharmaceutical Production Facilities |
| Code | BP3 |
| Degree Programme | Master of Science in Life Sciences |
| Group | Bio/Pharma |
| Workload | 3 ECTS (90 student working hours: 42 lessons contact = 32 h; 58 h self-study) |
| Module Coordinator | <p>Name: Cedric Schirmer Phone: +41 (0)58 934 54 64 Email: cedric.schirmer@zhaw.ch Address: ZHAW Life Sciences and Facility Management, Campus Grüental, 8820 Wädenswil</p> |
| Lecturers | <ul style="list-style-type: none"> • Cedric Schirmer, ZHAW • Martin Krahe, Bideco AG • Henry Weichert, Sartorius • Nicole Fontourcy, Cytiva • Valentin Rüttimann, Cytiva • Olaf Stoll, S&G Gebäudetechnik AG • Pascal Wirth, Wirth+Wirth Architekten |
| Entry requirements | <ul style="list-style-type: none"> • BSc in Biotechnology, Chemistry, Mechanical Engineering or Plant Engineering • Study of provided reading material • Usage of software Visio • Self-test on MSLS Community Centre • See also information under "comments" |
| Learning outcomes and competences | <p>After completing the module, students will be able to:</p> <ul style="list-style-type: none"> • Plan and design biopharmaceutical production facilities This concerns both traditional biopharmaceutical production facilities and facilities of the future. • Choose the optimal facility set-up under consideration of compliance and regulatory aspects, special features of newly constructed and rebuilt facilities, supply chain management, Industry 4.0 demands, automation concepts and project management • Use software Accelerator Vision Platform |
| Module contents | <ul style="list-style-type: none"> • Overview of modern design concepts of biopharmaceutical production facilities: From the manufacture of the drug substance to the drug product, pros and cons • Facility concepts (vertical or horizontal arrangement, conventional biopharmaceutical production facility vs. facility of the future) • Modularization of production facilities (standard personnel airlock, clean room and technical interstitial area, technical process chase and HVAC concept) • Room concept (zone concept) of the production level ("Closed systems" in "Controlled -Non-Classified Room" and "Controlled-No-Classified (CNC) Room Concept") • Closed processing (where are the open gaps?) |

| Comments | There is a participant limit in this module. Registrations will be prioritized according to the following order: <ol style="list-style-type: none">1. Students for whom BP3 is a compulsory module2. Students from the BP-Cluster3. Students who need the ECTS for the graduation in the semester concerned | | | | | | | | | | | | | | | | | | | | | | | | |

| | |
|--------------------|---|
| | 4. The remaining places will be drawn by lot Whether participation is possible will be communicated by the end of week 37. |
| Last Update | 10.03.2025 |
