

Zephyr®

Zephyr Project Meetup

February 12, 2026

5:00 PM - 9:00 PM

Winterthur, Switzerland

Event Hosts:

WLAN-Name: **guest-ZHAW**

Access-Code: **253837**

111

Welcome to the Zephyr Project Meetup Winterthur

Dr. Michael Eisenring
Head Business Unit Embedded Systems

School of Engineering
Institute of Embedded Systems

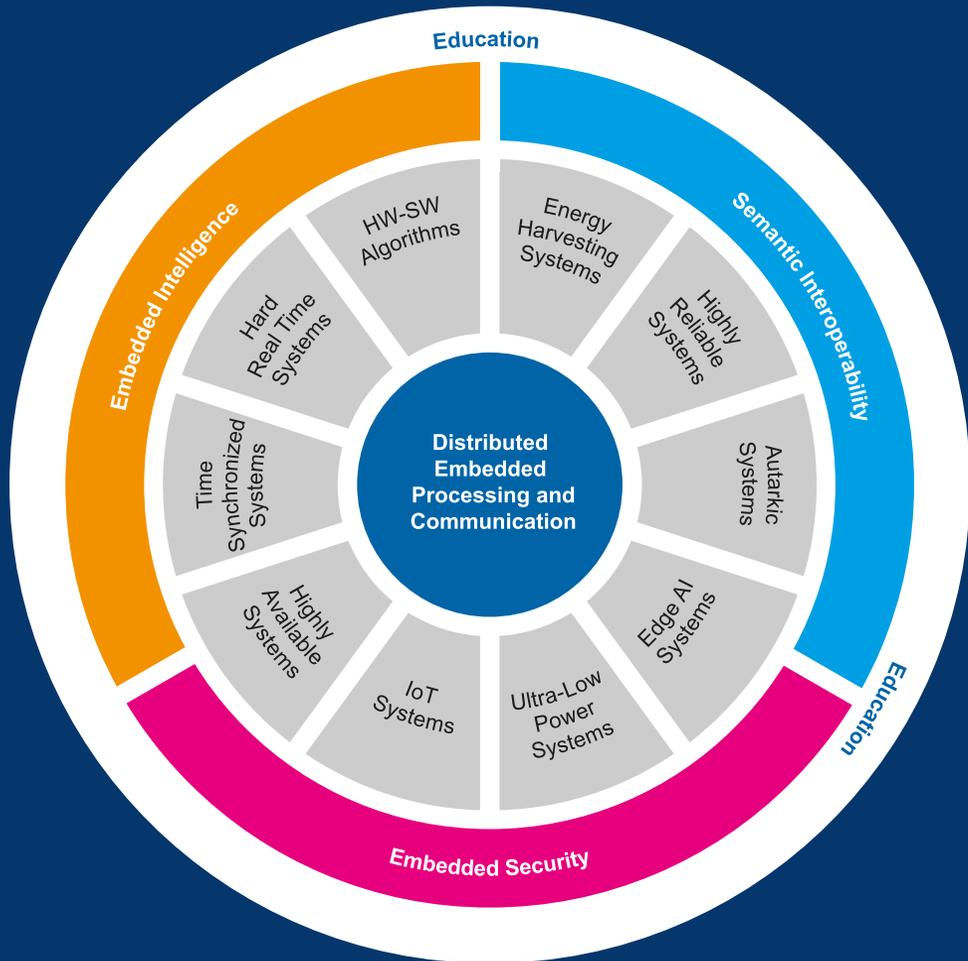

Prof. Andreas Rüst
Head of Institute of Embedded Systems

Zephyr in Research and Education

Institute of Embedded Systems
February 12, 2026 | Prof. Andreas Rüst

Industrial Partners & Students Search Vendor Independent Expertise

ZHAW – Institute of Embedded Systems (InES)

Research

Embedded Processing and Communication

- Research projects
- System concepts and feasibility studies
- Design of Hardware and Firmware
- Evaluation of technologies and components
- Proof-of-concepts
- Reference implementations

Education

Bachelor and Master, Continuing Education

- Degrees in Computer Science, Electrical Engineering, Systems Engineering
- Broad spectrum of introductory and advanced courses
- Lectures and labs
- Student projects and theses
- Continuing education (for university graduates)

How to Leverage Embedded Expertise for so Many Application Fields?

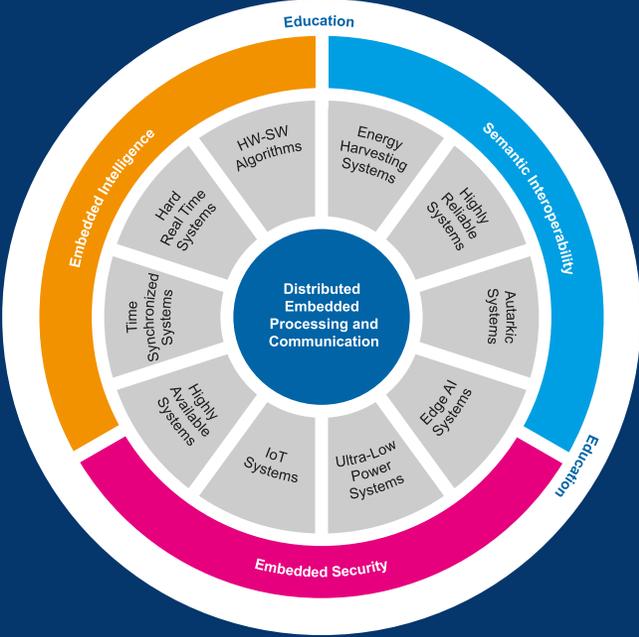

Application Expertise

- Smart Cities
- Infrastructures
- Buildings
- Logistics / Supply
- Manufacturing
- Agriculture
- Health
- Avionics
-

Industrial Partners
Other Research Entities

Embedded Expertise

More than 60
Employees at InES

Diverse microcontrollers:
Vendors, cores,
peripherals, power-down
modes

External chip devices from numerous
vendors: Sensors, memories, Secure
Elements, RTCs ...

Wired and wireless communication
interfaces like ble, 802.15.4, WiFi,
Ethernet, LoRaWAN, NFC, NB-IoT

Services like threads,
synchronization, messaging,
Secure Boot, Secure Storage,
Logging, File System, ...

Communication
stacks and
processing libraries

The Plan: Find a Universal System to Build Individual Variations

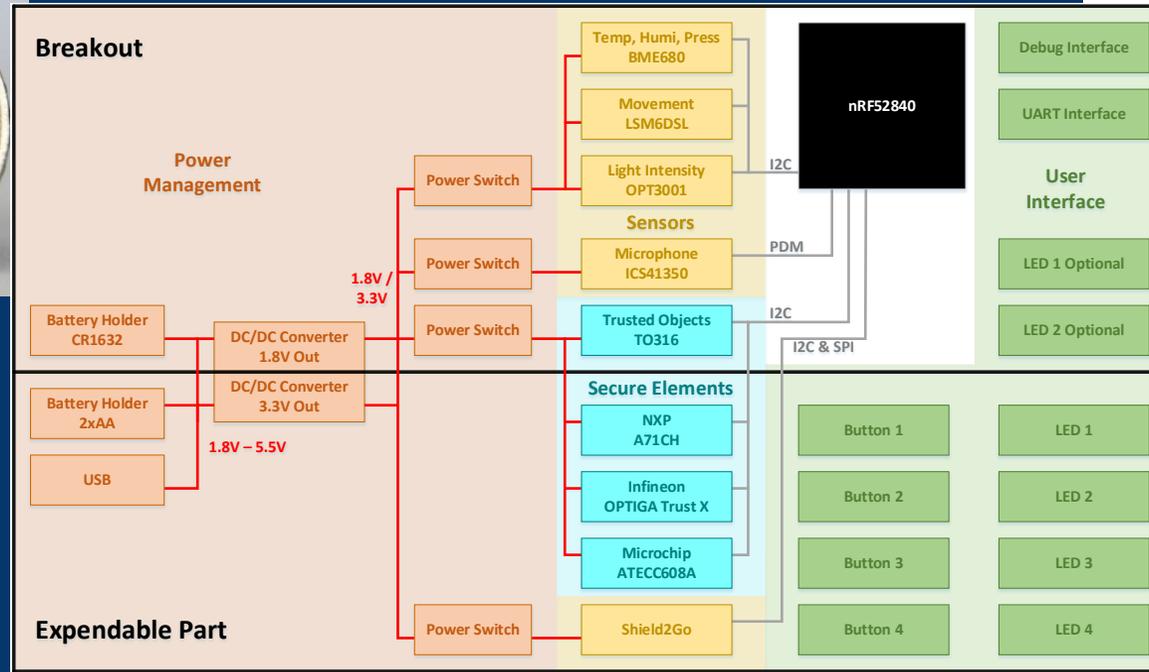

Can Zephyr Be the Swiss Army Knife We Are Looking For?

Master Thesis by Benjamin Häring

Low power, secure IPv6
Sensor Node based on
OpenThread

Consolidating IoT Firmware Architectures with Zephyr

ZÜRICH UNIVERSITY OF APPLIED SCIENCES

INSTITUTE OF EMBEDDED SYSTEMS

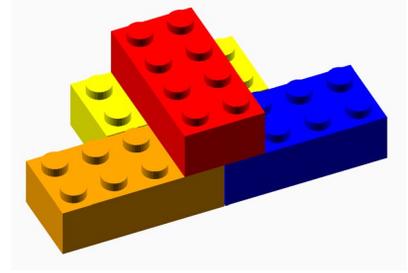

Authors Benjamin Häring
Supervisor Prof. Andreas Rüst
Version 1.0

Last changes

May 31, 2019

Plus demos on Nordic,
STM32 and NXP Evalboards

Research: Recent Example I

Monitoring Olive Oil

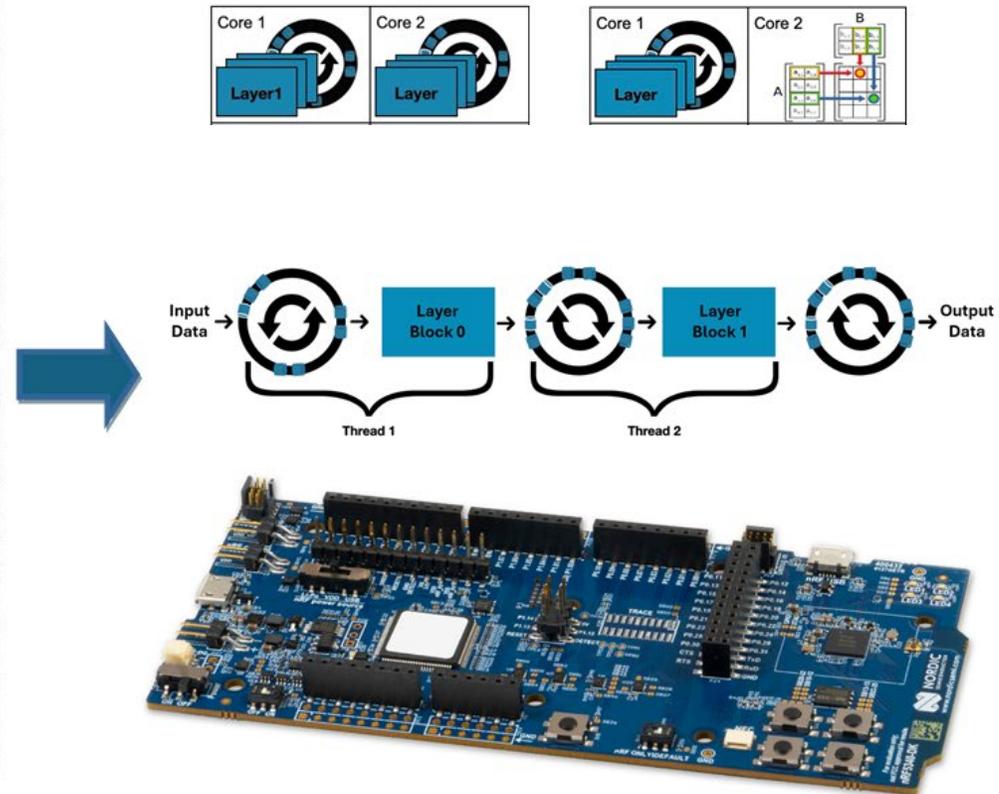

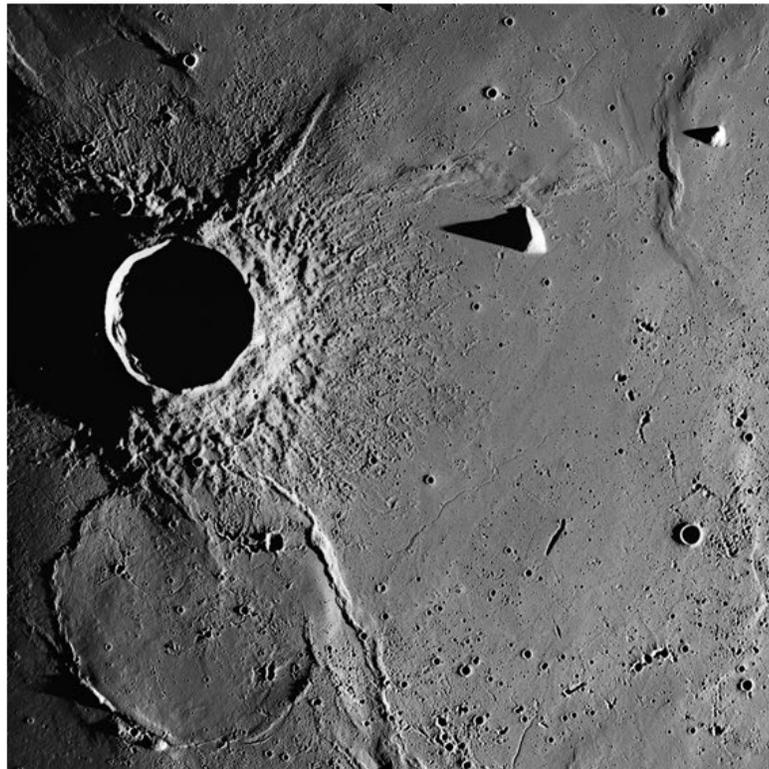

Firmware for sensors, edge processing, NFC and LoRaWAN communication runs on Zephyr

INNOSUISSE: IOTA: Internet of Things - Amfora. A Swiss Digital Solution for Global Foodservice

Research: Recent Example II

Dependable/Power-efficient AI on Highly-constrained Systems

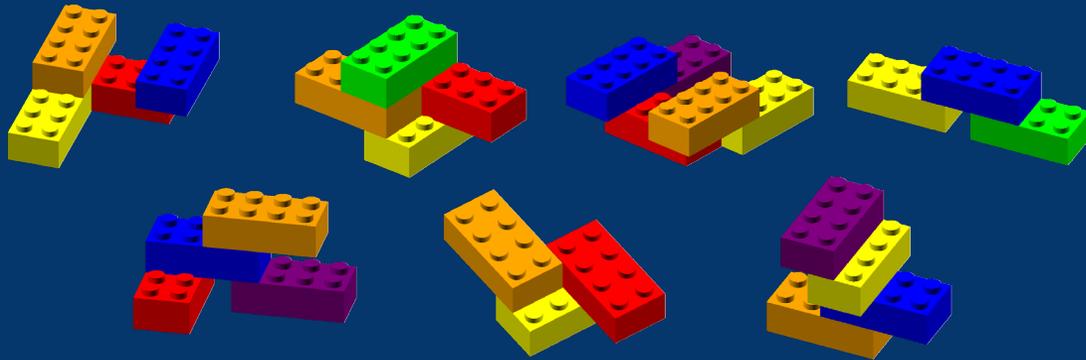

Demonstrate the software AI orchestration for the use case of a moon landing on a dual core using Zephyr.

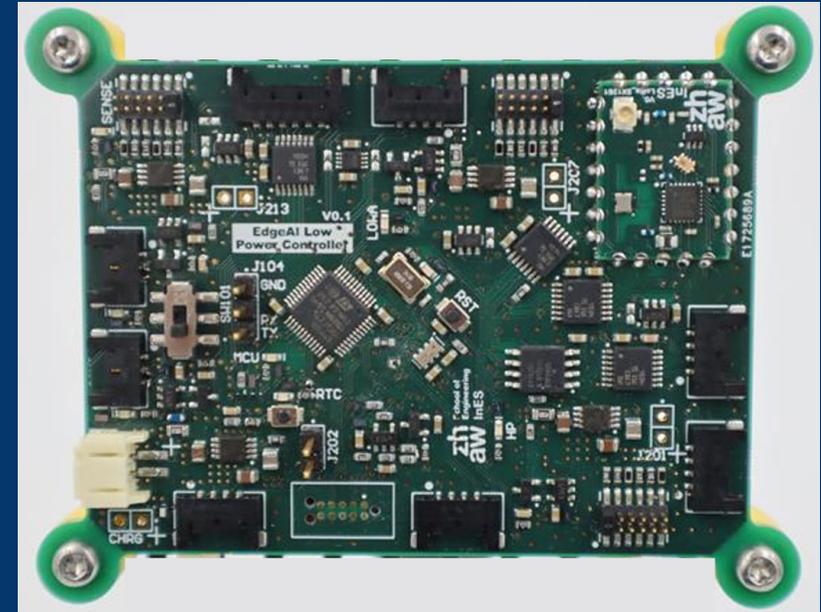

See More of Our Projects at the InES Booth

Here at the Zephyr Project Meetup

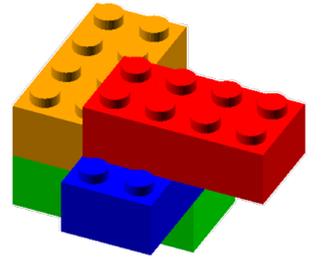

Seven projects on display

Running on Analog Devices, Nordic,
NXP, Raspberry Pico, STM

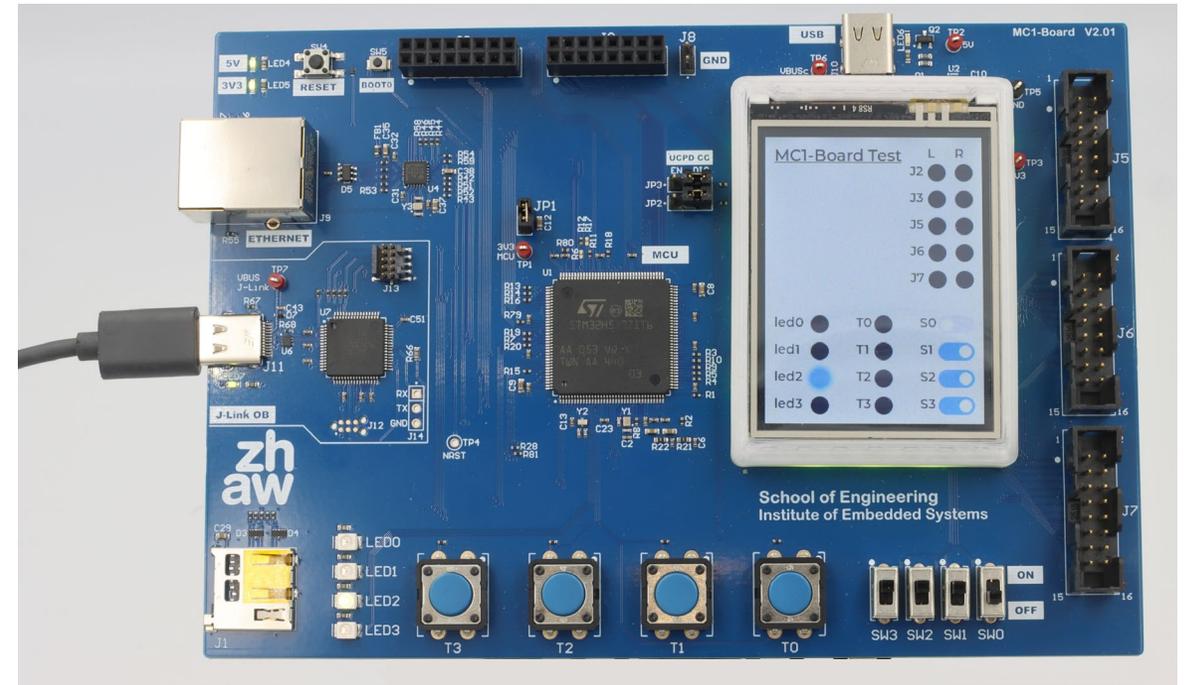

Education Example

Microcomputer Systems 1 (MC1)

- Advanced course in Bachelor program
- 5 out of 14 weeks based on Zephyr 4.2
 - Threads and interthread communication
 - ZTest
 - Secure Boot
- Zephyr was introduced 3 years ago
- Every year we are extending the Zephyr part

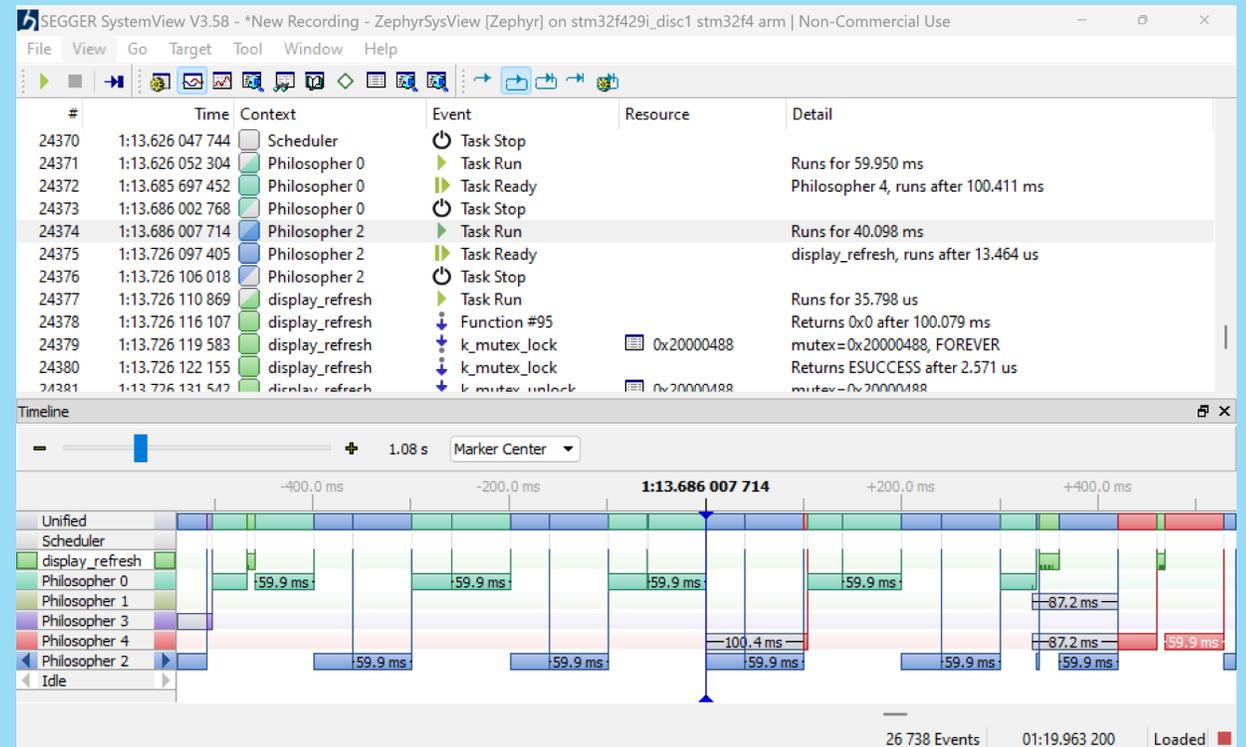

Labs are done with the MC1 board designed by ZHAW-InES.
Based on STM32H5

We are NOT teaching Zephyr, but

– we are using Zephyr as a platform to teach Embedded Systems

– Enable fast learning progress

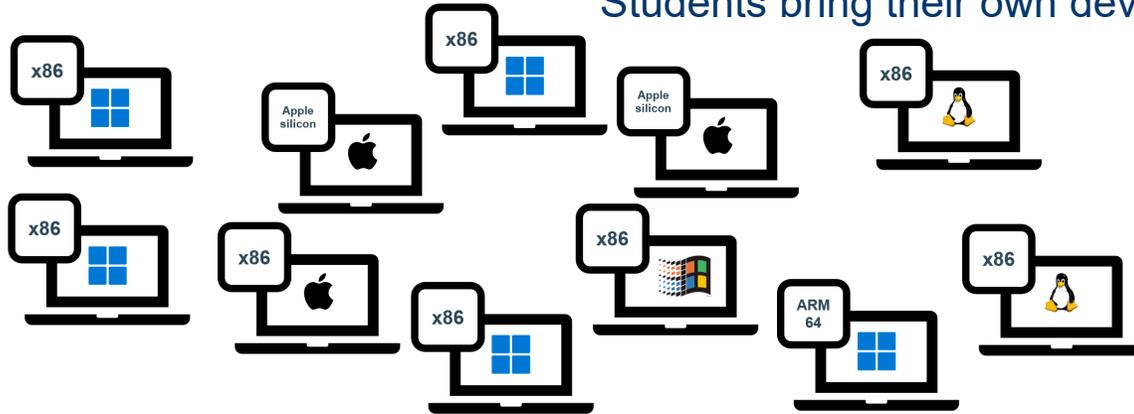

Experiencing real time effects in the Masters course Embedded Realtime

Education: Time in the Labs Is Limited

Do not waste it on the installation of tools.

Students bring their own devices

Development Environment for Students

- Works on Windows, macOS and Linux
- Uniform and reproducible
- Easy to maintain
- Easy and quick to set up, easy to use

Customized, lean containers

Load with WSL2 (Windows) or Podman (macOS, Linux)

WSL: Windows Subsystem for Linux

• Import file system as WSL2 distro on Windows

```
mkdir "C:\WSL\zephyr_v4.2.0"  
wsl --import zephyr_v4.2.0 "C:\WSL\zephyr_v4.2.0" \  
zephyr_nrf_v4.2.0_wsl.tar.zst  
wsl -d zephyr_v4.2.0
```

Zephyr Development Environment for Students

Johannes Witzig¹, Flavio Felder¹, Vixay Phimmasane¹, Simon Künzli^{1*} and Andreas Rüst¹

¹Institute of Embedded Systems, Zurich University of Applied Sciences, 8401 Winterthur, Switzerland

Abstract

The Institute of Embedded Systems at the Zurich University of Applied Sciences uses Zephyr both in research projects and for several lab exercises for BSc, MSc, and students in continuing education. These labs include topics like embedded security, bootloaders, and general operating system concepts. In this paper, we discuss the challenge of providing a uniform Zephyr development environment that can be set up quickly and reliably.

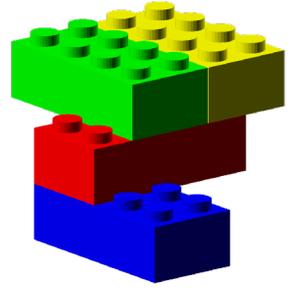

Keywords

container, development environment, education, WSL, Zephyr, ZHAW

ZiSE 2025

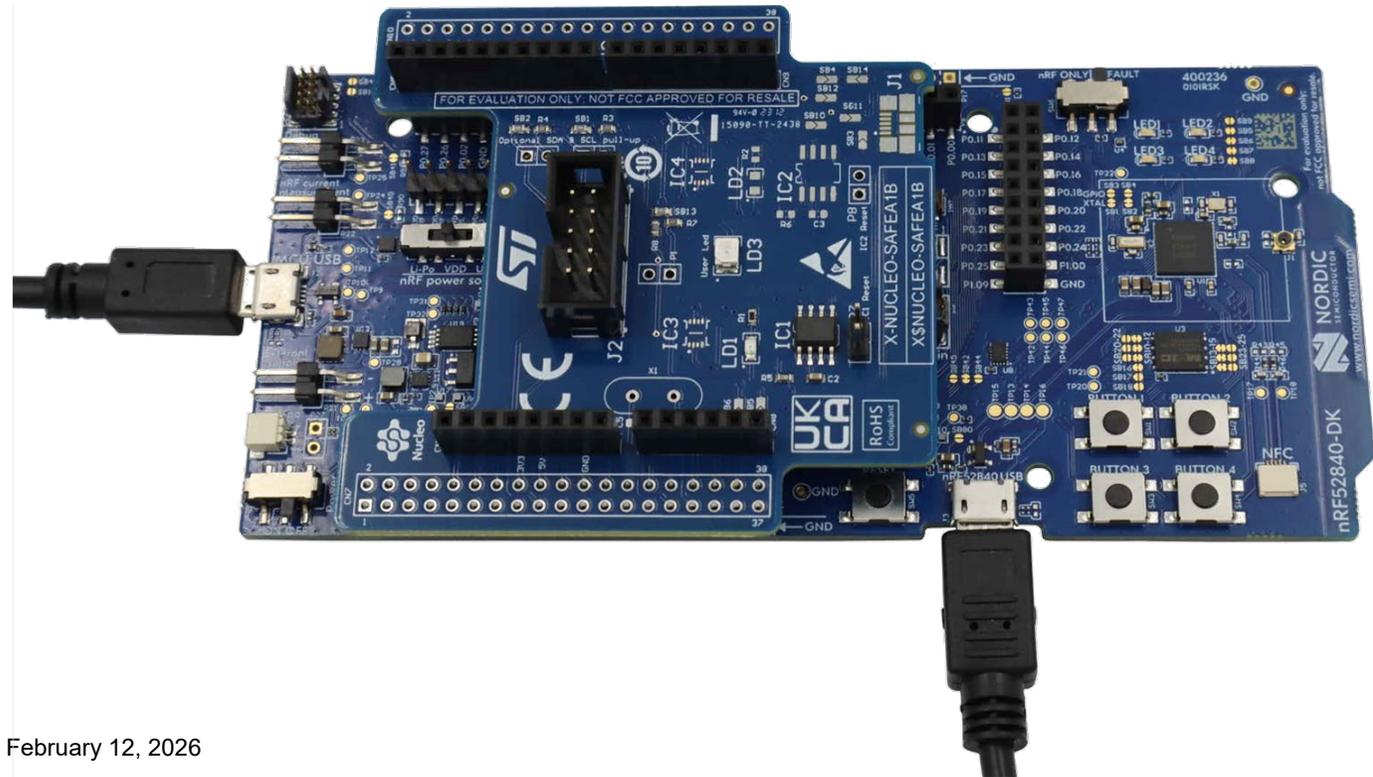

1. International Conference on Zephyr in Science and Education

Continuing Education – WBK Security in Embedded Systems

- EU Cyber Resilience Act (CRA)
- Knowledge and tools for implementing security measures in networked devices with limited resources
- By Dr. Simon Künzli

Among others, enjoy hands-on labs with the STSAFE-A110 secure element

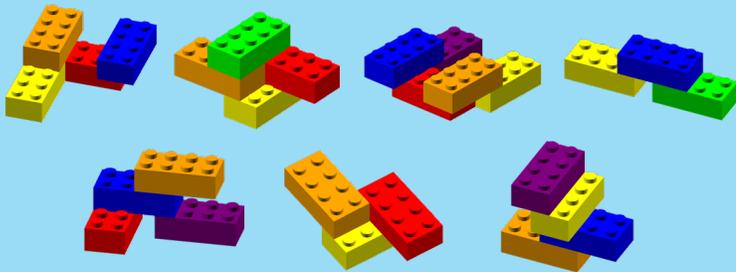

Zephyr Is the Swiss Army Knife

Research for Industrial Partners

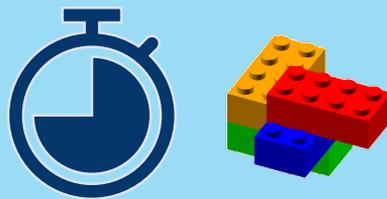

- Fast prototyping
- Reuse
- Maintainable
- Variety

→ Numerous projects, many MCU vendors, countless external devices and communication interfaces, multiple protocol stacks, several papers

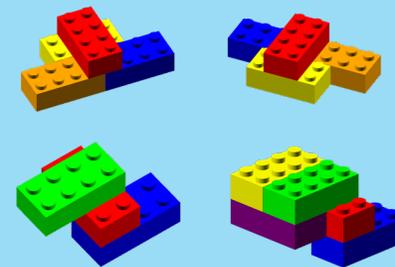

Education Modules

- Lectures and Labs
- Zephyr as a platform to teach Embedded Systems
- Customized, lean containers
- Enable fast learning progress

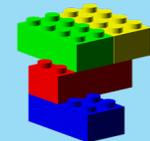

Student Projects and Theses

- Flying start, do not start from scratch
- Benefit from and stimulate research projects
- Supported by the Zephyr community at InES

Continuing Education

- Provide hands-on training
- E.g. in Embedded Security
- Leverage expertise from research projects

Noser Engineering AG

Dr. Michael Eisenring
Head Business Unit Embedded Systems

«We drive innovation
through technology
we know how.»

Program

5:00 pm – 5:30 pm – Welcome snacks & drinks

5:30 pm – 5:50 pm – Welcome note & lightning talk on Zephyr in Research and Education: Prof. Andreas Rüst, Institute of Embedded Systems

5:50 pm – 6:10 pm – Rust with Zephyr: An Overview: Dr. Andreas Nussberger, Noser Engineering

6:10 pm – 6:30 pm – Zephyr Optimisations: through the looking ~glass~ code: Loic Domaine, Doulos GmbH

6:30 – 6:45 pm – Real-Time Isn't Optional: How Zephyr Guarantees Safety at Racing Speeds: Jil Zerndt, Zurich UAS Racing

6:45 pm – 7:15 pm – Break time – Pizza, Board giveaways

7:15 pm – 7:35 pm – How to Out Of Tree a Trusted-Firmware-M (TF-M) board for the STM32U5Axx MCU: Gerson Budke, Leica Geosystems AG

7:35 pm – 7:55 pm – Replacing CAN: How Single-Pair Ethernet and TSN Enable the Next Generation of Embedded Systems: Kilian Brunner, ZHAW Institute of Embedded Systems

7:55 pm – 8:15 pm – Audio-over-Ethernet using Zephyr: Peter Büchler, Noser Engineering

8:15 pm onwards – Networking, Board giveaways

Boards giveaway at Noser and InES Booth

Solve the riddle on the Luma Matrix

Win a board 😊

Board Sponsors:

Let's meet at the Apéro!

We are interested in your feedback!
