

Ergänzende Veranstaltung der School of Engineering

Titel: Future oriented technology analysis

Kürzel: EVA_FOTA

Umfang in Credits	3 ECTS
Veranstalter	ZHAW Zurich University of Applied Sciences, School of Engineering Institute of Sustainable Development (INE), Winterthur, Switzerland
Leistungsnachweis/Bewertung	Oral assignment (presentation of FOTA) / evaluation sheet (40%) Written assignment (group work report) / evaluation sheet (60%)
Startdatum	Workshop 1: date KW38, 09.00-17.30 hrs (Kick-off) Workshop 2: date KW39, 09.00-17.30 hrs Workshop 3: date KW44/45, 09.00-17.30 hrs Workshop 4: date KW03, 09.00-17.30 hrs (Presentation Day)
Art der Durchführung	Four full-day workshops (teaching, in-class activities and group work progress meetings; total 30 hours) separated by independent self-study immersion and small group work periods (total 60 hours). In-class attendance is required and compulsory.
Unterrichtssprache	Teaching is generally in English. Student presentations and group work reports may be given/submitted in English or German.
Kurzbeschreibung (max. 300 Zeichen)	Future oriented technology analysis (FOTA) is vital for any forward and strategic planning or policy activity to be able to meet future challenges proactively in order to transform sociotechnical energy and transport systems. This module enhances FOTA by gathering anticipatory intelligence in a systematic way and linking it to today's decision making, as well as by acquiring knowledge on conceptual, methodological and operational approaches to futures assessment.
Modulinhalte und Lernziele	<p>Goals: In this Module, the students will</p> <ul style="list-style-type: none"> • gain competences in future oriented technology analysis, understanding the conceptual approach to futures research and how to design a foresight process and architecture • acquire insights into a range of creative futures research and foresight methods, such as Delphi expert survey, scenario development, and technology analysis • apply successful tools and software (e.g. realtimedelphi.com, LCA SimaPro) to deepen and experience the transferred knowledge in applied small group work <p>Contents: Workshop 1 : Future oriented concepts, foresight process design Workshop 2 : Applied technology assessment (e.g. LCA); group work Workshop 3 : Scenario development, analysis & roadmap; progress Workshop 4 : Presentation of small group works, debriefing</p>

Ergänzende Veranstaltung der School of Engineering

Zulassungsvoraussetzungen	Bachelor of Science (or equivalent), English language skills. This module will respect the competence level of the students in future oriented technology analysis.
