

Externship Workshop

Advanced Family Nursing

Dr Lorraine M. Wright, Dr Janice M. Bell

22 May to
25 May 2018
Winterthur,
Switzerland

Externship Workshop Advanced Family Nursing

Dr Lorraine M. Wright and Dr Janice M. Bell will present their **Advanced Practice Models for Caring for Families with competence, confidence and compassion.**

Our health care system needs Family Nursing in order to meet the current challenges such as increasing chronic illnesses, a growing population of elderly, and new healing and treatment practices that soften suffering and promotes hope and healing. As a specialist in Family Nursing you are able to assist families experiencing complex and serious illnesses and to provide clinical leadership for your nursing and health care team.

This 4 day workshop provides the extraordinary possibility to have Drs Wright and Bell in Switzerland. The presenters will offer their specific knowledge, research and clinical skills that will enhance and enrich your important work of caring for families through direct clinical practice, education, and/or research. Specifically, they will present their Illness Beliefs Model and the Trinity Model that are described in their books “Beliefs and Illness: A Model for Healing, 2009” and “Suffering and Spirituality: The Path to Illness Healing, 2017”.

Content

- Illness Beliefs Model: Advanced Practice Clinical Model
- Trinity Model: Advanced Practice Clinical Model
- How to offer and conduct useful and healing therapeutic conversations
- How to soften illness suffering and promote hope and healing
- What are the family interventions that matter and are most effective?
- What is the connection between suffering and spirituality?
- Application of two advanced family nursing clinical models in practice, research, and education with families
- Observation/Participation in a live family interview
