The ZHAW is one of the leading universities of applied sciences in Switzerland. Teaching, research, continuing education and other services are both scientifically-based and practice-oriented. ZHAW graduates are able to apply their knowledge responsibly in demanding professional fields. In its work in research & development, the ZHAW concentrates on important societal challenges, with a particular focus on energy and societal integration. With locations in Winterthur, Zurich and Wädenswil, the ZHAW is firmly integrated in the local region whilst also cooperating with international partners. There are eight Schools in the University: Applied Linguistics, Applied Psychology, Architecture, Design and Civil Engineering, Engineering, Health Professions, Life Sciences and Facility Management, Management and Law, and Social Work.

Education

The ZHAW gives students the chance to acquire the skills they need to succeed at the professional level and also to gain a new perspective on their work. Many programmes are taught in English, enabling international students to complete their studies in Switzerland. The ZHAW offers a comprehensive range of nationally- and internationally-recognised programmes. Some departments offer part-time programmes to allow students to combine their studies with their professional work. The campus is situated in Zurich, one of the world’s leading financial centres. The ZHAW also offers a wide range of continuing education courses and programmes in all areas of life sciences and health.

The Bachelor’s and consecutive Master’s degree programmes at the ZHAW:

- Master’s programmes: Architecture, Civil Engineering, Engineering, Life Sciences, Management, Psychology.

The Bachelor’s and consecutive Master’s degree programmes of the ZHAW are designed to meet the expectations of students and industry. They are characterised by a modular structure: smaller units are combined to make up larger units. For example, an MAS programme can also be studied part-time.

260 Diploma and Certificate programmes (DAS/CAS) and many programmes of Advanced Studies programmes (MAS/EMBA/MBA), around 50 Master programmes at the ZHAW includes approximately 50 Master programmes: Architecture, Civil Engineering, Engineering, Life Sciences, Management, Psychology.

The ZHAW is the perfect partner for lifelong learning, offering a wide range of continuing education courses and programmes in all areas of life sciences and health.

- Bachelor’s and consecutive Master’s degree programmes as well as a large number of double degrees.
- Training in areas such as business, engineering, social work, human resource management, facility management, life sciences, and more.
- Bachelor’s programmes: Accounting & Controlling, Banking and Finance, Business Administration, Business Information Technology, Business Law, International Management.
- Bachelor’s programmes: Aviation, Computer Science, Systems Engineering, Transportation Systems.
- Bachelor’s programmes: Aviation, Computer Science, Systems Engineering, Transportation Systems.

The research profile of the ZHAW is characterised by two key strategic focal points: energy and societal integration. The ZHAW is actively involved in European research infrastructures in 59 countries. It is actively involved in European research infrastructures.

Research and Development/Consultancy and Services

The ZHAW offers extensive services, including:

- Consulting services for industry and other universities on cutting-edge projects.
- Long-term research and development projects. The ZHAW offers different forms of collaboration to serve different needs: student projects and theses, research contracts and services, mid-term and long-term research and development projects. The ZHAW is a centre of excellence in applied research, offering a wide range of services to industry and other universities. The ZHAW is engaged in research projects in both national and international cooperation, and offers consultation, research and training services to industry and other universities.

This publication is printed in a climate-neutral process on 100% recycled paper.
