

Fall series LAND PhD seminars Academic year 2023\2024

In the context of *LAND Doctoral Programme in Applied Linguistics: Managing Languages, Arguments and Narratives in the Datafied Society*

ECTS: 1,5

Evaluation: To gain ECTS a student has to participate and complete both seminars. It is possible also to participate in a chosen seminar without gaining ECTS.

Program:

26-27 October 2023 (at USI)

Prof. Andrea Rocci, Dr. Olena Yaskroska-Shah: “The ‘data-analysis-theory’ circle in the study of dialogue and argument.” – 6h

The course will take place from 2 PM-6 PM, on-site or online. Further information to follow.

25-26 January 2024 (at USI)

Prof. Sara Greco: “The Argumentum Model of Topics (AMT) approach to argumentative inference”. - 8h

The course is designed for advanced argumentation students as well as for novices who have never heard about the AMT before but are interested in argumentation analysis.

Further information to follow.

- Place: USI, Lugano, via Buffi 13
- Lecturers: prof. Sara Greco, prof. Andrea Rocci, dr Olena Yaskorska-Shah

Topic, focus:

We offer a series of short seminars in the academic year 2023\2024. Seminars focus on the objectives of the PhD program: the analysis of human language use in datafied societies by combining three analytical dimensions: the context, the media, and the modes perspectives. In the fall semester, we are focusing on the interrelations between theory and data.
