Specialisation in:
- Food and Beverage Innovation
- Pharmaceutical Biotechnology
- Chemistry for the Life Sciences
- Applied Computational Life Sciences

Tuesday, 5 March 2019
Tuesday, 1 October 2019
6 pm – 8 pm,
Campus Grüental, Wädenswil

Master’s Degree in Life Sciences: make a difference

The Master of Science programme gives you the opportunity to study the latest scientific developments and stay on the pulse of social trends. With your Master’s thesis, you will help combat some of the major challenges faced by society today, while also fostering your own leadership skills and promoting your development into a sought-after industry specialist. Choose from the following specialisations:

Food and Beverage Innovation

Changes in consumer behaviour and in society constantly demand new solutions in the food and beverages sector: new raw materials and technologies are always being discovered and developed. Within this complex and dynamic context, you will analyse agri-food systems – from the raw goods through the processing stages to the ultimate launch of the finished consumer products.

Chemistry for the Life Sciences

Chemists in the life sciences are qualified for practice-oriented careers with expertise that straddles various disciplines. You will apply your skills and knowledge across the fields of chemistry, biochemistry, analytics, materials technology and nanotechnology. In a research and development context, you will address socially relevant problems through an interdisciplinary, goal-oriented approach and develop solutions of major practical relevance.

Applied Computational Life Sciences

With the advent of new technologies, the life sciences are developing rapidly and producing vast amounts of data. Computational methods play a fundamental role in analysing the data and modelling and understanding the underlying systems. Avail yourself of the opportunity to enter this prospering domain of high future relevance.
