

Master in Life Sciences

A cooperation between
BFH, FHNW, HES-SO, ZFH

Module title	Regulatory Affairs
Code	BP4
Degree Programme	Master of Science in Life Sciences
Group	Bio/Pharma
Workload	3 ECTS (90 student working hours: 42 lessons contact = 32 h; 58 h self-study)
Module Coordinator	<p>Name: Dr. Marc Pfeifer Phone: +41 (0)27 606 86 61 Email: marc.pfeifer@hevs.ch Address: HES-SO, Institute of Life Technologies, Rue du Rawyl 64, 1950 Sitten 2</p>
Lecturers	<ul style="list-style-type: none"> • Dr. Marc Pfeifer, HES-SO • Industry, authority and/or consulting firm representatives
Entry requirements	B.Sc. in Life Sciences (e.g. Chemistry or Biotechnology); Basic knowledge of Quality Management
Learning outcomes and competences	<p>After completing the module, the student will be able to:</p> <ul style="list-style-type: none"> • understand the role and importance of regulatory affairs within regulated industries (i.e. pharmaceutical, medical device and in vitro diagnostics) • apprehend how product development and manufacturing as well as associated processes and milestones are interlinked with documentation deliverables • appreciate the relevance and high-level conception of clinical and performance evaluations • give support with the preparation and compilation of quality- and regulatory-relevant documents
Module contents	<ul style="list-style-type: none"> • Role and responsibilities of regulatory affairs professionals within an organization in the healthcare industries • The module will contain two major – related, yet distinct – parts: 1) a drug / biologics, and 2) a medical device / IVD regulatory pathway development (which includes identification of applicable regulations and standards as well as registration sequence for different countries in the world) • Changes in the regulatory landscape in Europe for medical devices and in vitro diagnostics (IVD), i.e. from directives to regulations • Integration of specific requirements in the quality management system (QMS) • Structured communication with Regulatory Bodies and Competent Authorities • Preparation of the technical documentation in preparation for CE mark and US FDA approval (e.g. including preparation of verification and validation activities)
Teaching / learning methods	Lectures will be given on the principles of Regulatory Affairs referencing guidelines and standards. The seminars will include reviewing real-world case examples also illustrating successful approaches as well as failures, shortcomings and other issues that have occurred in the past. This course requires active participation and individuals / groups are required to develop feasible solutions for potential industry use. The students during interactive exercises are coached by the experts.
Assessment of learning outcome	1. The report of a case study (prepared in groups) has to be handed in latest 3 weeks after the end of the module (100%)
Format	Summer school

BFH, FHNW, HES-SO, ZFH

Timing of the module	Spring semester, week 25							
	Day of the block week	<1	1	2	3	4	5	>5
	Contact teaching (lessons)		8	9	9	8	8	
	Self-study (hours)	8	2	2	2	2	2	40
Venue	Sion							
Bibliography	Literature and regulatory guidelines will be provided during the course.							
Language	English							
Links to other modules	Any quality-related, analytical method developments and drug / IVD / med. device development module.
