Module title	**Polymers and Applications**
Code	C3
Degree Programme	Master of Science in Life Sciences
Group	Chemistry
Workload	3 ECTS (90 student working hours: 42 lessons contact = 32 h; 58 h self-study)
Module Coordinator	**Name**: Dr. Pierre Brodard **Phone**: +41 (0)26 429 67 19 **Email**: pierre.brodard@hefr.ch **Address**: Haute école d'ingénierie et d'architecture Fribourg, Perolles 80, 1700 Fribourg
Lecturers	• Dr. Pierre Brodard, HEIA-FR • Dr. Roger Marti, HEIA-FR • Dr. Laure Lalande, HEIA-FR, Plastic Innovation Competence Center PICC • Dr. Dominik Brühwiler, ZHAW • Guest lecturers (experts from the industry)
Entry requirements	Chemistry at Bachelor of Science level. Knowledge required in: Organic chemistry (reactivity of carbonyl and carboxylic acid derivatives, radical reactions) & Analytical and physical chemistry (spectroscopy, thermal analysis, chromatographic methods). Preparatory reading will be made available, including a self-test on Moodle for students to check their actual understanding of the topic.
Learning outcomes and competences	After completing the module, students will be able to: • design and execute typical synthetic methods for the preparation of polymers • select appropriate analytical and physico-chemical methods to characterize polymers • work with inorganic polymers and biopolymers and use them for applications • explain polymer processing and industrial application of polymers
Module contents	Synthesis of polymers (Chain-growth and step-growth polymerization) Chemical Post-Polymerization Modifications Characterization of polymers Biopolymers (“Bio”-Plastics & Biodegradable Polymers, Polyhydroxyacides, Polysaccharides, Chemical synthesis of biomacromolecules) Inorganic & electronic polymers Polymers processing Industrial applications
Teaching / learning methods	• Basic concepts and theoretical backgrounds by lecturers • Inputs by guest lecturers from industry and academia • Exercises and analysis of case studies • Lab visits with hands-on demonstration • Questions & Answers (Q&A) session (individual support)
Assessment of learning outcome	1. Written exam (closed books), final (100%).
Format	Winter school
Timing of the module	Autumn semester, CW6
