

Networking Event Series – Sustainable Finance Technology

An event series organised by ZHAW School of Management and Law, Swiss Sustainable Finance and supported by Innosuisse

Workshop on Novel Data Solutions

Tuesday, 30 November 2021

This workshop will focus on sustainable finance data and technology, with the goal of providing investors and NGOs with actionable knowledge on novel ESG data and tools that can be applied to track companies' environmental and social footprints such as natural language processing, spatial data and life cycle assessment.
