CAS Corporate Risk and Insurance Management

Navigate uncertainty with data and confidence

Corporate risk and insurance managers operate at the intersection of risk, insurance, finance, and governance. In a complex and uncertain business environment, they identify emerging risks, manage insurance and risk financing solutions, and support informed decision-making. This CAS equips professionals with the knowledge, methods, and confidence to turn risk information into sound decisions.

“This CAS raises the professional standard of corporate risk and insurance management and strengthens business resilience in Switzerland.”

Evelyn Lämmli, CEO SBB Insurance AG

“Today’s complex risk landscape requires commercial underwriters to combine technical expertise with analytical skills and a deep understanding of their clients’ businesses. This CAS provides this broader perspective.”

Jörg Bertogg, Head Commercial Insurance, Zurich Insurance Group
